You may *not* use your books, notes, graphing calculator, phones or any other internet devices on this exam.

You are required to show your work on each problem on this quiz.

Problem	Points	Score
1	3	1.75
2	4	1.25
3	3	6
Total:	10	3

1. (3 points) Starting with the initial guess $x_1 = -2$, use Newton's method to approximate a root to the equation $e^x + x^2 - 3 = 0$ to eight decimal places.

$$x_1 = -2$$

$$f(x) = e^x + x^2 - 3$$

$$f'(x) = e^x + 2x$$

$$x_{n+1} = x_n - \frac{f(x_n)}{f'(x_n)}$$

$$x_2 = x_1 - \frac{f(-2)}{f'(-2)}$$

$$= -2 - \frac{1.13533528}{-3.86466471} = -1.70622671$$

$$x_3 = x_2 - \frac{f(x_2)}{f'(x_2)} = -1.70622671 - \frac{-5.729726}{-3.342989} = -3.42057661$$

$$x_4 = x_3 - \frac{f(x_3)}{f'(x_3)} = -3.42057661$$

$$f(-2) = e^{-2} + (-2)^2 - 3$$

$$= 0.135335 + 4 - 3$$

$$= 1.13533528$$

$$f'(-2) = e^{-2} + 2(-2)$$

$$= 0.135335 - 4$$

$$= -3.86466471$$

$$f(x_2) = e^{x_2} + (x_2)^2 - 3$$

$$f'(x_2) = e^{x_2} + 2(x_2)$$

My Answer is

$$-3.420567$$

$$0.181546541$$

$$1.713953941$$

$$-2.91126958$$

2. (4 points) If $600\pi \text{ cm}^2$ material is available to make a cylinder with an open top, find the largest possible volume of the cylinder.

Hint: The surface area of a cylinder with an open top is $\pi r^2 + 2\pi rh$, where r is the base radius, h is the height.

$$S = \pi r^2 + 2\pi rh$$

$$V = 600\pi \text{ cm}^2$$

$$V = \frac{1}{3}\pi r^2 h$$

$$A = ?$$

$$V = \pi r^2 h$$

I need to work on this

I studied fencing
&

Cone problems.

Survey about this

+1.25

3. (3 points) Show that the curve $y = \sqrt{x^2 + 5} + 2x$ has one slant asymptote at $y = 3x$ and one horizontal asymptote at $y = 0$.

$$y = \sqrt{x^2 + 5} + 2x$$

And this one.

+0

$$(x^2 + 5)^{1/2} + 2x$$

DON'T be discouraged!
